

# Stay Connected & Healthy with ChoiceConnect™

As your primary-care physician, I am responsible for being the primary source for your care. Accordingly, ChoiceConnect will help us stay in touch with you outside of the office and these services come at **no cost to you or to Medicare.**

**Post discharge outreach calls** are conducted to confirm you are feeling well, address any issues from an inpatient or Emergency Room visit, and to help you schedule a timely follow up with me.

**Chronic disease management** is offered to patients that would benefit from periodic outreach calls to help you manage your healthcare needs outside of the office.

## Remote Monitoring Extension of our Office to Eligible Patients with Breathing Conditions, Blood Sugar, and Heart Health issues

### How Does ChoiceConnect Remote Monitoring work?

Our office is launching ChoiceConnect to help you stay healthy from the comfort of your home.

- All you need is a phone to participate.
- You will receive weekly messages or phone calls asking about your condition-specific symptoms.
- The text messages or phone calls will arrive at the date and time that you choose. It only takes a few minutes each week to respond to messages.

You can get immediate help from a ChoiceConnect care manager if you respond with worsening symptoms or health concerns. The nurse will respond to work with you and our office to help you get better.

### Why should you enroll?

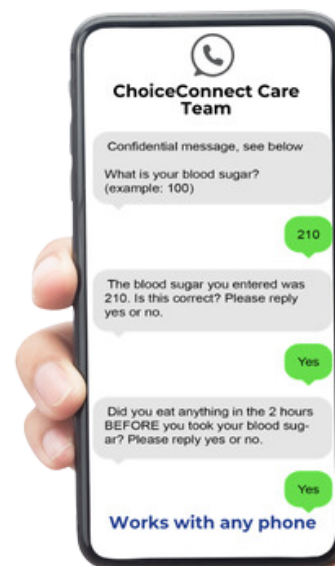

It's a great way to stay connected with our office between doctor's appointments.

### How do you enroll?

If eligible, you can expect a call from my office or Caller ID of ChoiceConnect to enroll.

### How do you Stay Active?

Respond at least once a week to stay active on Choice Connect.

**PLEASE NOTE:** This service is not intended to replace any communications you already have with your care team and is not intended to replace 911 or emergency services.

**Call 911 if you're experiencing a life-threatening emergency.**
